EDUCATION

University of Pittsburgh • 2022
PhD & **MS** in Cognitive Psychology,
minor: quantitative methods

Seton Hall University • 2017
MS in Experimental Psychology,
concentration: cognitive neuroscience

St. Mary's College of Maryland • 2014
BA in Psychology,
minor: educational studies

RESEARCH SKILLS

Methods
Lab / Online Studies
Focus Groups
Survey Design
Prototyping / Wireframing
Contextual Inquiry
Usability Testing
Intervention-based research
Science Communication
Participant recruitment

Tools

Qualtrics	Sketch
MTurk	Figma
E-Prime	Tobii (Eye Tracking)

DATA ANALYSIS SKILLS

Methods
A/B Testing
ANOVA
Linear Regression
Logistic Regression
Mixed-Effects Models
Machine Learning

Tools

R / RStudio	RShiny
Python	SQL
SPSS	neo4j

SUMMARY

I am a trained cognitive psychologist with 8 years of experience in researching human behavior. My work in causal learning & decision making provides me with a unique perspective, particularly for how people process data and learn about new concepts. I'm an adept problem-solver with expertise in quantitative and qualitative methods. I also have extensive experience in front-end & back-end programming.

WORK & RESEARCH EXPERIENCE

Teaching "Why Correlation Doesn't Imply Causation"

Roles Lead Researcher, Designer, Data Analyst | *2021 - now*

- Designed and tested three different interventions that use a causal diagrams tutorial to teach students about alternative explanations for a correlation in an observational study.
- Used insights from results and participant feedback to make iterative improvements. Participants learned the most in the final version & had a significantly better understanding of the material.
- Mentored undergraduate research assistants in research methods and qualitative coding techniques.

Fostering Resilience and Engagement in Law Students

Roles Researcher, Designer, Data Analyst | *2022 - now*

- Co-led focus groups with first-year law students to gain insight about their experiences & deliver a "belongingness" intervention that encouraged an adaptive mindset.
- Conducted A/B testing to compare an online versus in-person method of delivery for the intervention.
- Designed and analyzed a mixed-methods survey to assess law students' experiences with the grading curve. Generated a summary report for the administration, which showed the negative impact of the grading curve policy on students' mental health and performance & led to its dissolution.
- Developed a method for long-term data collection, management, and future analyses.

HONORS & AWARDS

Big Idea Blitz, 2nd place | 2022
University of Pittsburgh

Graduate Council Award | 2021
Learning, Research &
Development Center at the
University of Pittsburgh

**Tim Post Award for Excellence in
Research, 2nd place** | 2021
Learning, Research &
Development Center at the
University of Pittsburgh

**St. Mary's Scholar Award for
Academic Performance** | 2014
St. Mary's College of Maryland

**Showcase Project Award for
Undergraduate Thesis** | 2014
St. Mary's College of Maryland

Teaching Fellow

Course Research Methods in Psychology | *2019 - now*

- Primary instructor for course sections with 90+ undergraduate psychology students.
- Deliver engaging online & in-person lectures about foundational principles of research.
- Develop homework assignments to encourage deeper understanding of the material & assessments to evaluate students' knowledge.
- Designed an RShiny application to help students visualize when they should control for third variables in a regression.
- Mentored undergraduate teaching assistants.

CliMate - A Smartphone App to Reduce Climate Anxiety

Roles UX Researcher, Design Lead | *2022*

- Collaborated with a team of clinical psychologists to develop an app that utilizes therapy techniques to reduce climate anxiety & help users engage in climate action.
- Conducted focus groups with the target market and communicated key insights with stakeholders.
- Designed a pitch deck for the "Big Idea Blitz" competition at the University of Pittsburgh; our team won 2nd place!

Studying Causal Learning over Long Timeframes

Roles Lead Researcher, Web Developer | *2017 - 2021*

- Built a responsive web application (& scheduling software) to study how people learn cause-effect relations over weeks.
- Led teams of 8+ undergraduate research assistants in recruitment (2000+ participants) & data collection.
- Designed and implemented a curriculum in R to teach undergraduate researchers (without statistical experience) how to analyze the data they collected.
- Analyzed large datasets using ANOVAs, t-tests, & regressions.
